

Specialized Marine Electronics Service Delivery Completed

Seatuker Ship Management Private Limited successfully executed comprehensive technical service attendance for critical scientific and navigation equipment under Purchase Order SMS/2026/LLP/055, issued by SEAS Marine Service LLP on 20 January 2026.

Scope of Services

The engagement covered structured technical attendance and service support for essential onboard communication and navigation systems, ensuring operational readiness and compliance alignment.

SVDR System

HMT 105 Voyage Data Recorder – Critical voyage recording and compliance system maintenance

MF/HF Radio

Samyung SRG-3150DN – Long-range marine communication system service and verification

JRC Radar

Marine navigation radar system – Technical inspection and performance assessment

Service Execution Highlights

Technical Inspection

On-site functional assessment and system verification performed to manufacturer specifications

Performance Validation

Comprehensive system checks ensuring operational readiness and compliance alignment

Documentation Standards

Complete compliance documentation, service reporting, and structured invoicing aligned with contractual terms

All service activities were completed within the defined service window while maintaining professional documentation standards and technical closure confirmation.

Operational Significance

The successful execution reinforces Seatuker Ship Management Pvt. Ltd.'s established capability in delivering specialized marine technical services.

Marine Electronics Expertise

Proven service coordination for navigation and communication systems

Compliance Support

Vessel compliance assistance and regulatory documentation standards

Technical Excellence

Vendor-aligned execution with structured service reporting protocols
